6K Closes \$82M as Part of Series E Fund Raise for Expansion of

The company's headquarters and the 6K Energy Battery Center of Excellence are located in North Andover, MA, with 6K Additive's production facility in Burgettstown, PA, and a full-scale

THE WORLDS FIRST SUSTAINABLE PRODUCTION

For battery materials, this combination of chemistry and morphology control means materials can be independently designed to optimize for power, energy density, and life, all with low production costs.

6K Closes \$82M as Part of Series E Fund Raise for Expansion of

About 6K 6K produces and innovates with UniMelt® microwave plasma technology for the localized production of critical materials. 6K's UniMelt technology is applied across a vast range of

6K Additive Signs Long-Term Supply Agreement with Siemens Energy

6K Additive will utilize nickel based superalloy revert streams from Siemens Energy as feedstock for the production of high performance additive manufacturing powders. The

Governor Lee, Commissioner McWhorter Announce 6K Energy to

Tennessee Gov. Bill Lee, Department of Economic and Community Development Commissioner Stuart McWhorter and 6K Energy officials announced today the company will invest in

New cathode battery plant to be built in Jackson, Tennessee

We thank this company for its decision to locate in Madison County and know that Jackson will be the ideal location for 6K Energy's newest manufacturing facility," said Stuart

6K Prepares for Major Advancement in Battery Materials with \$25M

NORTH ANDOVER, Mass., April 28, 2021 /PRNewswire/ -- 6K, a rising star in the production of sustainable advanced materials for energy storage, today announced the creation of a

6K Prepares for Major Advancement in Battery Materials with \$25M

North Andover, MA. April 28, 2021 - 6K, a rising star in the production of sustainable advanced materials for energy storage, today announced the creation of a Center of Excellence for its 6K Energy division

UniMelt® Applications for Batteries and Energy Storage

We develop materials products for the next generation of battery technologies. Learn more about UniMelt® applications for advanced energy storage materials.

Battery Material Manufacturer 6K Raises \$82 Million in Series E Funding

6K, a materials producer for energy storage and additive manufacturing powders, closed \$82 million in a Series E funding round. This funding represents the first close of Series E, with the

48V 100Ah

6K Energy Announces IRA Compliant LFP and NMC Lithium-Ion

About 6K 6K produces and innovates with UniMelt® microwave plasma technology for the localized production of critical materials. 6K's UniMelt technology is applied across a vast range

6K Inc's MIT-born plasma reactor is singlehandedly solving battery

Sam Trinch, President of 6K Energy, the division manufacturing lithium-ion battery material for energy storage, mobility and electric vehicles, provides a technical overview of 6K's main
