AGL Torrens Island Battery

Wärtsilä's 250 MW / 250 MWh energy storage system will support the growth of renewables and be the first battery constructed as part of AGL's targeted 850 MW national battery pipeline.

Flying closer to the sun - the new drivers of decarbonisation

Even Australian energy companies are moving away from fossil fuels. AGL, the largest emitter of greenhouse gases in Australia, recently announced a new policy, providing a pathway to

AGL signs huge battery storage deal, hails "dawn of battery age"

Australian energy giant AGL has signed a major deal for battery storage that will see four large-scale batteries - each of 50MW/100MWh - developed in NSW by the Australian renewable

AGL leans into transition with 1.4GW battery project pipeline

Australia's biggest electricity generator AGL Energy is targeting 1.4GW of grid-scale battery storage projects as part of its plan to transition from coal-fired generation and achieve net zero by 2035.

Australia's AGL ramps up battery storage to drive green transition

Company Profile AGL Energy Limited is an Australia-based company, which operates an electricity generation portfolio within the National Electricity Market and is a private investor in

How does solar battery storage work?

But if you've installed solar power battery storage, the switchboard directs any excess solar energy you are generating to the battery - charging it up for later use. When the sun goes
