

Alternative energy

Overview

Renewable energy (also called green energy) is energy made from renewable natural resources that are replenished on a human timescale. There are also other renewable energy technologies that are still under development, including ,

Global energy consumption in 2019 was approximately 65 petawatt-hours (PWh) per year or 65,000 terawatt-hours (TWh) annually. Investment in renewables, especially solar, tends to be more effective in creating jobs than coal, gas or oil.

Alternative energy

US pushes 'new normal' in Iran, tells India there's 'no better energy

You can't have a better alternative than the USA," he said, highlighting the US's position as a major energy producer capable of supplying global markets.
