NHOA Energy secures first MACSE battery awards in Italy with 600

Rome: NHOA Energy said Monday that it has been awarded its first large-scale battery energy storage systems (BESS) under Italy's MACSE capacity mechanism, with two projects totalling

With MACSE, the Italian BESS Market Looks to Stability Instead of

Pexapark analyzed the trade-off between revenues under the MACSE scheme and merchant revenues over the same contract duration, here focusing solely on revenue projections and

CASHFLOWS Revenue stack MACSE-selected project

Revenue stack - MACSE-selected project
Revenue Analysis If a 7% IRR is targeted, the minimum MACSE bid premium should be equal to XXX EUR/MWh/year. From 2028 until the end of the 15

NHOA Energy partners with IPPs, utilities and infrastructure funds to turn BESS pipelines into competitive and resilient operational assets, on time, on budget and built for long-term performance.

Italy's First BESS auction set a new benchmark, but at what cost

Italy's first-ever auction for grid-scale battery storage has reshaped the country's energy landscape and tested the limits of how aggressively investors are willing to bet on this asset class.

CASHFLOWS Revenue stack MACSE-selected project

Considering a 7% IRR as a target and based on a series of different costs for the energy component (in EUR/kWh), the 8-hour system maintains dominance in terms of competitive bid over the 4-hour system.

A Practical Guide to MACSE Competitor Analysis and Bid Modelling

These scenarios require various assumptions being made regarding merchant revenues post-MACSE, in addition to project repowering costs. A higher merchant outlook would

MACSE tender opens BESS opportunities and challenges

MACSE tender opens BESS opportunities and challenges Italy awarded 15-year fixed-tariff tolling contracts to 15 standalone battery energy storage systems totalling 10GWh in its first

Investors, the race for the MACSE auction is on

Remuneration under MACSE is expected to be worth up to EUR34,000 per megawatt contracted, depending on the discharge duration contracted. Thus, a 10-hour discharge period would

A more competitive Italy with renewables, storage and stable rules

Our proposals for a more competitive Italy: 1. RES and BESS auctions planned and consistent with the NECP (National Energy and Climate Plan) and PNRR (National Recovery and Resilience Plan)

NHOA Energy Secures 600 MWh BESS Projects in Italy Under MACSE

NHOA Energy, global provider of utility-scale energy storage systems, has been awarded two new Battery Energy Storage System (BESS) projects in Italy by a leading independent platform

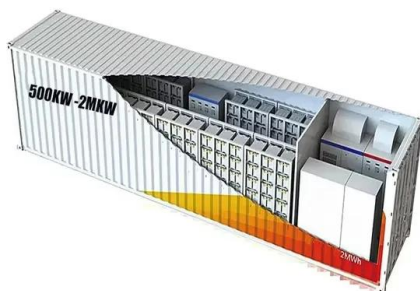

Widening power spreads likely to drive Italian BESS operators' MACSE

LONDON (ICIS)- Multiple market experts, including a source from KYOS Energy Consulting, have told ICIS that BESS operators are likely to opt for a hybrid bidding strategy at the

MACSE tender opens BESS opportunities and challenges

The systems have durations ranging between four and eight hours and are due to start operations by 2028. The tender was four times oversubscribed and the weighted-average allocation

#decretobollette #renewables #storage #manifesto #planning

The #manifesto also puts forward four shared operational proposals: 1introducing multi-year #planning and a clear #auction calendar for renewable and BESS capacity; 2extending Italy

Widening power spreads likely to drive Italian BESS operators'

The post-2028 horizon poses the threat of "battery cannibalization" - the new BESS capacity contracted by MACSE could reduce price spreads, thus cannibalizing battery arbitrage

Italian BESS & MACSE state of play

Italy has emerged as one of the most attractive European markets for Battery Energy Storage System (BESS) investment. Much of the attention has centered around the bankability
