Echogen's EPS30 System Multi-platform solution currently in final design stage 1.35 MW rated output (net) Commercial availability late 2016 Compatible with medium-speed diesels and small gas

Echogen Power Systems SCO2

With over 5 years of development, this industry leader mature extractor machine has been sold since 2015 and is part of many profitable businesses. The process can also be used for electrowinning, e

PROJECT PROFILE: Echogen Power Systems (T2M3)

Echogen will lead the conceptual design and modeling of a sCO₂ power cycle for the TCES application. Southern Research will continue the development, testing, and optimization of MgO

sorbent materials.

Approach , Echogen Power

Our approach is grounded in real engineering. We test, tune, and refine every system ourselves, turning complex thermodynamics into proven, high-performance solutions. While others pitch ideas, we

Echogen Power Systems Information

Echogen Power Systems is a Renewable Energy Equipment Manufacturing, Electricity, Oil & Gas, and Energy Production company located in Akron, Ohio with \$6.2 million in revenue and 22 employees.

Commercial Agreement to Deploy Grid-Scale Long Duration Energy

Echogen Power Systems, a leader in sCO₂ energy systems, is pleased to announce the signing of an agreement with Westinghouse Electric Corporation, to pursue the deployment of Echogen's cutting

Energy Storage , Echogen Power Systems

At the heart of Echogen's PTES system is a simple idea done right: use proven thermodynamics to store massive amounts of energy as heat, then turn it back into electricity with precision turbomachinery.

Echogen

Our supercritical CO₂ (sCO₂) heat pump delivers clean, efficient heat powered by electricity. Designed for industrial processes that demand serious temperature (X-Y °F), it's a drop-in solution that

Technology , Echogen Power Systems

Echogen's supercritical CO₂ waste heat recovery systems convert high-grade industrial waste heat into clean, dispatchable power with no added fuel or emissions. Our compact, closed-loop systems

Echogen Power Systems

About Echogen Power Systems Echogen Power Systems develops advanced heat-to-power conversion systems within the energy sector. The company specializes in converting industrial waste heat into

Echogen: Revenue, Worth, Valuation & Competitors 2026

On average, Echogen is believed to generate yearly revenue close to \$3.8M. The company's workforce productivity is estimated at \$147K in annual revenue per employee. There are currently more than

Firm , SBIR

The Echogen Cycle is a system platform, scalable from 250 kW to greater than 50 MW, that can operate with heat sources from 400 F to 1,200 F with efficiencies that exceed 30% in a small system footprint.

Echogen Power Systems

Echogen is a leader in developing thermal systems utilizing carbon dioxide (CO₂) as the working fluid, including industrial-scale high-temperature heat pumps, heat-to-power systems, and utility-scale long

High-Efficiency Power & Energy Storage Solutions , Echogen Power

Discover Echogen's proven supercritical CO₂-based systems designed for industrial decarbonization, grid-scale storage and high-temperature heat/ power conversion--real hardware, built to scale.
