CATL Unveils TENER Stack: The World's First 9MWh Ultra-Large

CATL debuts 9MWh TENER Stack, the worlds first ultra-large energy storage system bins split-design transport compliance, 5-year zero-degradation cells, 20% cost

CATL Unveils TENER Stack: The World's First 9MWh Ultra-Large

With a single-unit capacity of 9MWh, it can fully charge 150 electric vehicles or power a typical German household for six years. "CATL remains a pioneer in the energy transition," said

CATL Unveils TENER, the World's First Five-Year Zero Degradation

CATL's cutting-edge cell technology supports the outstanding performance of the system. TENER is equipped with long service life and zero-degradation cells tailored for energy storage

CATL TENER Stack: High-Capacity, Modular Energy Storage

Discover the TENER Stack by CATL--now delivering over 9MWh of energy capacity. With its "Two in One" modular design, it increases land-use efficiency by 40% and reduces

construction costs by 20%.

CATL TENER Launch Highlights the Future of Energy

Power revolution on the rise! At EES Europe 2024, we unveiled TENER, the world's 1st mass-producible energy storage system to achieve 0 degradation in 5 year

Unveiling the Future of Energy Storage: CATL TENER Energy

X Energy of eternity stems from the power of technology. On April 9, #CATL revealed TENER, the premium #ESS that will usher in a new era of energy storage.

CATL Unveils World's First 9MWh TENER Stack: Redefining Large

Global battery giant CATL has raised the bar for large-scale energy storage solutions with the debut of its TENER Stack, the world's first 9MWh ultra-high-capacity system set for mass

CATL Unveils TENER, the World's First Five-Year Zero Degradation

On April 9, CATL introduced TENER, the world's first mass-producible energy storage system that experiences zero degradation in the first five years of use, in Beijing, China. Featuring

CATL released 9MWh TENER Stack energy storage solution

The TENER Stack achieves a significant breakthrough in capacity, enabling a 20% reduction in overall station construction costs. The TENER Stack adopts CATL's high energy density cells, featuring a
