

How much nippon energy

Overview

Japan is a major consumer of energy, ranking fifth in the world by primary energy use. As of 2022, the country imports 97% of its oil and is the largest liquefied natural gas (LNG) importer globally. In the post-war period, Japan's energy policy underwent significant transformation as it grappled with limited domestic energy resources. • • • • •

In 1950, coal supplied half of Japan's energy needs, one-third, and oil the rest.
