

# How much solar austral

## Overview

---

Australia leads the world in residential uptake of solar, with a nation-wide average of free-standing households with a PV system at over 20%. Over 90% of solar panels sold in Australia are made in China, a situation not unique to Australia, since China manufactures some 75% of the world's solar. In 2001, the Australian government introduced a mandatory renewable energy target (MRET) designed to ensure renewable energy achieves a 20%. The Solar Homes and Communities Plan was a rebate provided by the Australian Government of up to. List of largest projects Projects with a power rating less than 100 MW are not listed.

## How much solar austral

---
