OverviewTypesUnitsAt the top of Earth's atmosphereOn Earth's surfaceApplicationsSee alsoBibliography

Solar irradiance is the power per unit area (surface power density) received from the Sun in the form of electromagnetic radiation in the wavelength range of the measuring instrument. Solar irradiance is measured in watts per square metre (W/m²) in SI units. Solar irradiance is often integrated over a given time period in order to report the radiant energy emitted into the surrounding environment (joule per square metre, J/m²) during

Solar Beam , Pokémon moves , Pokémon Database

These Pokémon learn Solar Beam at the level specified. The numbers given are for Pokémon Scarlet & Violet and may vary in other games; check the respective Pokédex pages for details.

Solar Beam

Solar Beam is a Grass-Type move that takes two turns to use. On the first turn the user charges up light, converting it into energy, then on the second turn the user discharges that energy in a beam of light

Solar Beam

Earn +3 if no other Pokémon has chosen the same Judge. These moves all have the same effect as Solar Beam. Requires a turn to charge before attacking. Grass Pokémon get STAB, and have their

Solar Beam , SM , Smogon Strategy Pokedex

Solar Beam This attack charges on the first turn and executes on the second. Power is halved if the weather is Hail, Primordial Sea, Rain Dance, or Sandstorm. If the user is holding a Power Herb or
