

If electricity goes out does solar still work

Overview

If you have solar and the power goes out, your power will go out, too—unless you have a backup system. electrical code requires rapid shutdown of a solar system to protect emergency workers and prevent dangerous backfeed current from passing onto distribution lines. Most homeowners with solar on their homes have what is called a “grid-tied” solar system, which means the panels are connected to an inverter.

If electricity goes out does solar still work

Does Solar Power Work During a Power Outage?

Does Solar Power Work During a Power Outage? Learn how your solar panel battery systems are affected by power outages. Use our solar panel calculator for cost details.
