

Leonics solar charge controller

Overview

This solar charge controller provides reliable DC power to DC appliances such as lamp, radio, TV or fans and also provides 7 selectable modes of timer operation for controlling ON/OFF DC load such as lamp, street light, garden light, gate light, obstruction light, etc. Its function is to regulate the voltage and current from the solar arrays to the battery in order to prevent overcharging and also over discharging. The SOLARCON SCM-series charge controller is the most sophisticated solar charger with PV Maximum Power Point Tracking (MPPT) algorithm.

Used Leonics Solarcon MPPT 6A charge controller

Leonics Solarcon MPPT solar charge controller, model SPT-1206. I have never used this unit, and it is untested. It was given to me about 12 years ago, but I never used it. When wired to a

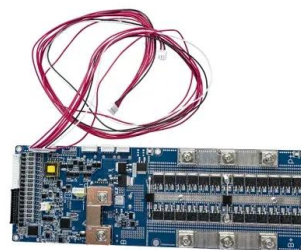

How to Design Solar PV System

Solar PV system includes different components that should be selected according to your system type, site location and applications. The major components for solar PV system are solar charge controller,
